POWER SUPPLY

The CD-player is delivered with a mains adapter and a rechargeable battery. Whenever convenient, use the supplied mains adapter if you want to conserve battery life.

Mains adapter, type SBC 6608

Use only the enclosed mains adapter, supplying 6 V DC with the pluspole ⊕ to the centre pin ⊕-⊖-⊖. Serious damage may occur if another adapter is used.

- First check that the mains voltage of the mains adapter corresponds to your local mains supply. If not, consult your dealer or service organisation. If the adapter is equipped with a voltage selector, set this selector to the local mains voltage.
- **At home:** connect the mains adapter to the DC 6 V socket. The battery supply is then switched off. After use, always disconnect the adapter from the wall socket.
- **In your car,** you can use the voltage converter from the optional car accessory kit SBC 3556 for power supply from the cigar lighter socket on your dashboard.

Rechargeable battery, type SBC 6404

Charge the battery prior to first use and also if the battery has not been used for a long period.

- Insert the battery in the CD-player (fig. 2).
- Connect the mains adapter to the DC 6 V socket.
- After 4 hours of charging, the battery is charged for 80% and after 8 hours it is fully charged. Charging longer (with a maximum of 1 week) will not harm the battery.

- If the CD-player does not function normally any longer, the battery is exhausted and must be recharged.
- Prevent the battery from being discharged completely, which would affect its charging capacity and lifetime.
- If the battery will not be used for a long period, store it fully charged outside the CD-player. Each battery, even when not in use, discharges slowly, so recharge the battery every 6 months to prevent it from being discharged completely.
- If the fully charged battery gets exhausted relatively quickly, it may be worn out and be due for replacement. A new or additional battery is available from your dealer under typenumber SBC 6404. Do not throw batteries in your rubbish bin.

CAR ACCESSORY KIT available from your dealer

SBC 3556 car accessory kit, contains:

1. Supply cable for power supply from the cigar lighter socket on your dashboard, with voltage converter from 12 V to 6 V
2. CD-cassette-adapter for CD-reproduction through you car radio cassette player, with lead and 3.5 mm stereo plug

CONNECTIONS

Headphone socket

- For stereo headphones (or mini loudspeakers) with 3.5 mm plug.

CD OUT socket

- For CD-reproduction:
 - **at home:** through your stereo system (amplifier, receiver, recorder, etc.). Use the supplied signal lead SBC 1059, to connect the socket CD OUT to the input sockets LINE IN, AUX or CD IN of the other set.
 - **in your car:** through your car radio cassette player using the cassette adapter from the car accessory kit SBC 3556.
- Adjust the sound with the controls of the stereo system or the car radio.

REMOTE socket

- For the supplied remote control with the functions PLAY ▷, PAUSE ||, STOP □ and ◀◀ PREVIOUS/NEXT ▶▶ (also for ◀◀ SEARCH ▶▶).

GENERAL MAINTENANCE

- The mechanism of the CD-player is fitted with self-lubricating bearings and therefore must not be oiled or greased.
- Fingerprints, dust and dirt on the apparatus can be removed using a soft, clean and slightly damp leather cloth. Do not use any cleaning agents which contain abrasives or solvents such as benzine thinner, alcohol, refined petrol or ammonia, since they may affect and harm the cabinet.
- Do not expose the set, batteries or discs to rain or moisture, or, for any great length of time, to excessive heat from heating equipment or direct sunshine, e.g. in cars parked in the sun.
- Keep the set and the discs away from sand.

CD-PLAYER AND DISCS

- The lens (X) (fig. 4) should never be cleaned.
- The lens may steam up when the set is taken from a cold into a warm environment. Playing a disc is not possible then. Do not clean the lens, but let the set acclimatize for a while.
- Always pick up the disc by the edge and put it back in its box immediately after use.
- To remove dirt from a disc, first breathe on the disc and wipe it off in a straight line from centre to edge (fig. 5) using a soft, lint-free cloth. The use of cleaning agents may harm the disc.

PLAYING A DISC

- Ensure that the HOLD switch is in position OFF.
- Connect headphones to the socket Ω .
- Press OPEN to open the disc cover.
- Insert the disc, printed side facing up (fig. 3) and close the cover.
- Adjust the sound with the VOLUME control and the DBB bass switch.
- Playback will start by pressing PLAY \triangleright . As soon as playback starts, the display shows the track number 1 and the elapsed playing time of the first title. When the second title is reached the track number 2 appears, etc.
- For brief interruptions, press PAUSE \equiv . The word PAUSE appears. To continue playback, press PAUSE \equiv again.
- To stop playback, press STOP \square . Now the display shows the total playing time and the number of tracks present on the disc.
- Open the disc cover only if the CD-player is in position STOP.
- In the STOP position, the CD-player automatically shuts down shortly after the last command, normally after 30 seconds and if a program is stored after 3 minutes. 10 seconds before shut-down the display starts flashing.

Remarks

- The CD player also goes to position STOP:
 - when the end of the disc is reached;
 - by opening the disc cover;
 - if the battery runs down or if the power supply is interrupted in another way.
- If the battery gets exhausted, the CD-player will not function normally, e.g. it does not start, E for Error appears, etc. In this case, recharge the battery by connecting the mains adapter to the DC 6 V socket.
- If PLAY \triangleright is pressed and the CD-player shuts down after some seconds, the CD-player cannot read the disc. Possible causes are:
 - you inserted the disc the wrong way: the label should face up (fig. 3);
 - the surface of the disc is badly scratched or dirty, see 'Maintenance';
 - the lens \otimes (fig. 4) is steamed up because of a sudden transition from a cold into a warm environment; do not clean the lens, but let the set acclimatize for a while;
 - the battery is exhausted. Recharge the battery by connecting the mains adapter to the DC 6 V socket.

SCAN

The SCAN function can be switched on from the STOP and PLAY mode.

- Press SCAN; the word SCAN appears. Only the first few seconds of each track are played.
- The moment you press PLAY ▷, the SCAN function is defeated (the word SCAN disappears) and the disc is played in the normal way from this track number.
- If you press ▷◁ or ◁◁ or PREVIOUS/NEXT, the SCAN function remains operative and the beginning of the next ▷◁ or previous ◁◁ track is played for a few seconds.
- If the SCAN function is not defeated by pressing PLAY ▷ or STOP ◻, the CD-player automatically returns to STOP as soon as the end of the disc is reached.

MODE (SHUFFLE and REPEAT)

By pressing the MODE button several times, all play modes will successively appear on the display:

- 1 x REPEAT 1 to repeat the the actual title continuously;
- 2 x REPEAT ALL to repeat the disc continuously;
- 3 x SHUFFLE to play the disc in a random order;
- 4 x SHUFFLE REPEAT to repeat the disc continuously in a random order;
- 5 x NORMAL (no display indication) to defeat the SHUFFLE and REPEAT modes.

In the MEMORY REPEAT ALL mode (if the word MEMORY is also visible on the display) only the titles stored in the memory will be played.

The mode MEMORY SHUFFLE is not possible. The word MEMORY will disappear when the next title is reached.

To defeat the REPEAT and SHUFFLE mode, choose position NORMAL (no display indication).

HOLD

When carrying the player with you, you can set the HOLD switch to position ON. **The CD-buttons are then inoperative** (except for the REMOTE control buttons). Now, playing a disc is not interrupted when a button is accidentally touched. For operating the CD-player buttons again, place the HOLD switch to position OFF.

◀◀ SEARCH ▶▶ (on the remote control) ◀◀ PREVIOUS/NEXT ▶▶

Release the button as soon as you recognize the required passage: the disc will be played in the normal way from this passage.

If the button is pressed longer than 10 seconds, the search speed increases.

 - When pressing **STORE** longer than 1 second, the display will show in sequence all stored track numbers.
 - You can simply erase the whole memory by pressing **STOP □** for a second time: the character **C** for **CLEAR** appears now.
- The contents of the memory are also erased:
- if the set shuts down automatically (3 minutes after **STOP**);
 - if the battery gets exhausted or if the power supply is interrupted in another way.

How to play the stored selection

To play your selection, the CD-player should be in position **STOP**; then press **PLAY ▷**; now, the word **MEMORY** appears.
